		Exemplary (8-10 pts)	Adequate (5-7 pts)	Needs improvement (2-4 pts)	Missing (1 pt)	Comments	Score
	Innovation:	Project is one-of-a-kind and solves either a previously unidentified problem or creates a better solution for a known problem	Project is relatively unique; may partially solve a novel or identified problem, but is not merely a marginal improvement on a known solution	Project is relatively cookie-cutter; may either be a solution that already exists and is well-established or may address an issue that does not actually exist	Project does not address a problem		
	Impact	Project focuses on a practical and concrete real-world problem of importance to the HealthTech community	Project is adequately practical but has some aspects that cannot be applied to a real world problem, or the problem undertaken is not of importance to the HealthTech community	Project is not practical and/or does not address a concrete real-world problem – it may deal in the abstract or not be feasible	Project does not address a problem in the HealthTech community		
	User Experience	Project is intuitive to use and visually appealing	Project is moderately intuitive and visually appealing; may have some unclear usage areas or may have some moderately unappealing aspects	Project lacks completely either the intuitive aspect or the visually appealing aspect, or both aspects are poorly represented	Project is not intuitive to use at all and is not visually appealing		
	Functionality	Project works at full capacity	Project is relatively functional, but contains some minor bugs	Project is functional but with major bugs or is only partially functional	Project is not functional
